

Making the Bow Hold on the Bow – Cello

Point the tip of the bow to the left and grab the bow in the middle with your LEFT HAND. Make the hair face the ground.

- Get your bunny bow hold with the right hand (in the air).
 - The tip of your thumb goes with the middle two fingers
 - Move your thumb to the first wrinkle of the middle fingers so the bunny had BIG teeth.
 - Tap you thumb at the wrinkle. “Munch, munch, munch. What’s for lunch?”

Point to the spot on your bow where the thumb will touch the bow, right next to the bump on the frog.

- Put the tip of your thumb on the stick, hitting the brown part of the bow. **KEEP HOLDING THE BOW WITH YOUR LEFT HAND ALSO!**
- Let all the fingers gently hang over the stick. Check to see if your thumb is touching at the **tip** and is bent. Spread out the fingers a little.
- Wrap around the fingers so the end of the second finger hits the metal clip on the bow.
- The third finger will wrap around the frog and the pinky will go slightly over the top of the stick.
- Lean your hand toward the first finger so the bunny can take a nap.
